

PROJECT DESIGN PHASE 1 SOLUTION ARCHITECTURE

ARCHITECTURE

- There was no an efficient solution available in the many companies during these days. Every process was based on paperwork, human fault rate was
- high, the process and the tracing the inventory losses were not possible, and there were no efficient logging systems.
- After the computer age, every process is started to be integrated into electronic environment. And now we have qualified technology to implement new solutions to these problems.

Example - Solution Architecture Diagram :

Main use cases of the inventory.
